

SOND-2M

Groundwater Level Meter

SOND-2 is a portable groundwater level meter that is used to determine the groundwater level in bores and wells.

The water level meter is compact, lightweight and easy to use. The body of the device includes the electronics. The body is fastened to a measuring tape with a connector. A 30 m, 50 m or any measuring tape or cable can be used. Once the sensor reaches the water level, it sounds a signal to notify the user.

The groundwater level measuring devices are rated IP65 under the international IEC 60529 standard and are splash and dust proof.

SOND-2M Features and Benefits

- Compact
- Measures any groundwater level depth
- Audible notification signal

Parameter	Units	Value
Measurement unit	cm	1
Length of measuring tape	m	30 or 50
Measurement accuracy	cm	+/-1
Power supply	V	12 DC
Operating temperature	°C	-5 to +40, at 100 % relative humidity
Dimensions	mm	Ø 32, L=235
Weight	g	151
